DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claim 1 is rejected under 35 U.S.C. 102(a) as being clearly anticipated by U. S. Patent No. 6,452,484 to Drori.

As per claim 1, Drori discloses providing resources including, establishing a plurality of relationships and performing at least a first function......(col. 4, line 59 to col. 5, line 16 and fig. 1).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 3-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Drori as applied to claim 1 above, and further in view of the examiner taking official notice.

As per claims 3-5, Drori does not specifically disclose the limitations of these claims. The examiner, however, takes official notice that these elements are well known

in the art of security systems. It would have been obvious to anyone having an ordinary level of skill in the art at the time the invention was made to have included these features in the invention of Drori since they comprise very well known elements necessary for the entire system to function in a secure and controlled environment.

Allowable Subject Matter

Claims 23-37 are allowed.

Claims 2, 6-22 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas R. Peeso whose telephone number is 571 272-3809. The examiner can normally be reached on Mon.-Fri, 7:00 a.m. to 3:30 p.m. The central fax number for the office is 571 273-8300.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron, can be reached on 571 272-3799.
